

Problem

Given an array of n integers $x_1, x_2, \dots, x_n$, our task is to find the maximum sub array sum, i.e., For example, in the array $[-1, 2, 4, -3, 5, 2, -5, 2]$ the following subarray produces the maximum sum 10: $[-1, 2, 4, -3, 5, 2, -5, 2]$

Input Format

Two line input First line should read an integer value which represents size of array Second line consists list of elements(integers) separated by space
