

Problem

Given a non-negative integer N, count the number of set bits (bits having value 1) in its binary representation.

Input Format

A single integer N.

Constraints

$0 \leq N \leq 10^{18}$

Submissions

Output Format

Print a single integer representing the number of set bits in N.

Language

Python 3

```
1 # Enter your code here. Read input from STDIN. P
2 n=int(input())
3 count=0
4 while n:
5     n=n&(n-1)
6     count+=1
7 print(count)
8
```
